

Charlotte Water / Architectural / Engineering Services

## Owners Advisor for the Clarke Creek Pumping Station and Force Main

This project will involve the construction of at least one pumping station and force main to transfer flows from east Mecklenburg county to a wastewater treatment plant within the Catawba River Basin. Gravity sewer improvements may be necessary to the receiving sewer. CLTWater is proposing installation of a new Clarke Creek Pumping Station and Force Main which would involve constructing a new pumping station close to the Mecklenburg-Cabarrus County Line, in order to divert the entire Clarke Creek Basin flows to the McDowell Creek WWTP. Progressive Design Build (PDB) is the recommended delivery model for this project. Due to critical project schedule and potential for complex multicriteria alternatives and risk analysis, Owner's Advisor (OA) services will be needed. In addition to decision analysis support, the selected OA scope will include scheduling and budgeting support for all phases of the project as it progresses, including monitoring design development for compliance with contract cost and schedule.

### Details

Posting Number	2021-Q4(Oct-Dec)-CW-7221
Anticipated Posting Date	2021-12-14
Commodity Code(s):	91842, 92500, 92517, 92535, 92555

### Requirements

Last Updated: 12/14/21

#### Estimated Total Value

The total project value is anticipated to be:

\$1,000,000 -4,999,999

## Contract Term

The term of the project is anticipated to be:

- Through Project Completion

## Insurance Requirements

The City requires the awarded vendor(s) to obtain and maintain the following insurance coverage types:

- Automobile-For automobile operations liability
- Errors & Omissions / Professional Liability-For negligence or failure to perform in a professional capacity
- General Liability-For bodily injury or property damage, arising from products, premises, completed work, personal & advertising injury
- Workers Compensation-For lost wages and medical expenses of injured workers
